DETAILED ACTION

Claim Objections

Claim 7 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 5. See MPEP § 608.01(n). Accordingly, the claim 7 has not been further treated on the merits.

Claims 8 and 9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 5 and 6. See MPEP § 608.01(n). Accordingly, the claims 8 and 9 have not been further treated on the merits.

Allowable Subject Matter

Claims 1-6 and 10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor suggest, in the claimed combination, a micro-electromechanical switching device including at least one pair of inductive elements electrically connected in series so that when a current flows through the inductive elements, their magnetic field interactions cause displacement of a mobile contact linked to one of the inductive elements between two positions, one of which allows an electrical connection between at least two conductive elements. The prior art of record uses either electrostatic actuation means, thermal actuation means, piezoelectric actuation means or a magnetic interaction between a coil and a magnet/magnetic material to achieve the same result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
